The American Journal of Physiology-Endocrinology and Metabolism is a world leader in reporting exciting new findings in this important field. The journal’s comprehensive scope includes:

- original studies at organizational levels ranging from the molecular, subcellular and cellular to whole organisms, including humans
- investigations in research areas including the secretion and action of hormones of the endocrine brain, the anterior pituitary gland, adrenal, pancreas, thyroid, parathyroid, gonads and reproductive tissues, the paracrine and autocrine control of endocrine cell performance, and hormonal or metabolite control of organic and inorganic metabolism
- examination of specific themes such as receptor activation, actions of hormones and growth factors, gene expression, ionic and membrane control of hormone secretion

The American Physiological Society (APS) and the Women in Physiology Committee are pleased to announce their partnership with MentorNet, an award-winning one-on-one mentoring program.

MentorNet's Academic Career E-Mentoring Program matches graduate students, postdocs and untenured faculty members in physiology with experienced scientists for an 8-month mentoring relationship conducted via e-mail.

MentorNet also offers a Résumé Database for students seeking jobs or internships.

Any APS Member or nonmember (of any status) can be a mentor in this program. However, to receive the benefit of coaching and guidance from a mentor, you have to be an APS Member with the status of “trainee or early career”.
