American Journal of Physiology-Endocrinology and Metabolism

Scope of Journal
The American Journal of Physiology-Endocrinology and Metabolism is a world leader in reporting exciting new findings in this important field. The journal’s comprehensive scope includes:

- original studies at organizational levels ranging from the molecular, subcellular and cellular to whole organisms, including humans
- investigations in research areas including the secretion and action of hormones of the endocrine brain, the anterior pituitary gland, adrenal, pancreas, thyroid, parathyroid, gonads and reproductive tissues, the paracrine and autocrine control of endocrine cell performance, and hormonal or metabolite control of organic and inorganic metabolism
- examination of specific themes such as receptor activation, actions of hormones and growth factors, gene expression, ionic and membrane control of hormone secretion

Authors are required to submit papers online at www.apscentral.org.

A Few HOT Articles
- AMP-activated protein kinase, a metabolic master switch: possible roles in Type 2 diabetes
  W. W. Winder, D. G. Hardie
  Am. J. Physiol. Endocrinol. Metab. Jul 01, 1999; 277: 1-10

- Glucagon and regulation of glucose metabolism
  Guoqiang Jiang, Bei B. Zhang

- Muscle, liver, and pancreas: Three Musketeers fighting to control glycemia
  Amira Klip, Mladen Vranic
  Am. J. Physiol. Endocrinol. Metab. Dec 01, 2006; 291: 1141-1143

- Glucose clamp technique: a method for quantifying insulin secretion and resistance
  R.A. DeFronzo, J.D. Tobin, R. Andres

- Osteogenic regulation of vascular calcification: an early perspective
  Radhika Vallikuti, Dwight A. Towler
  Am. J. Physiol. Endocrinol. Metab. May 01, 2004; 286: 686-696

Reader & Author Benefits
- Fully searchable text, including PubMed
- Rich color and sharp resolution of figures
- Editor’s Home Page at www.the-aps.org/publications/ajpendo
- FREE access to the extensive collection of back issues available online 12 months after publication
- FREE e-mail notification of new content as it becomes available
- Manuscripts online within days of acceptance
- Perpetual/Electronic Archiving of the LOCKSS and CLOCKSS systems preserves the electronic content of all APS journals

Authors can choose to pay $2,000 on top of regular author fees and have their article made free immediately.
Interested in...improving your manuscript writing or improving your poster presentation?

Hear what a past participant had to say: "Writing the paper and being able to hear critics from the whole group is an experience to remember. So many good ideas and critics in so little time...wow!"

Who should apply: graduate students and post docs in all areas of physiology

What: Course in writing and reviewing for scientific journals and poster presentation skills

Where: Disney World, Lake Buena Vista, Florida

When: Every January

Why: The programs give students the opportunity to learn critical skills: how to network, give a formal introduction, and present effectively. The courses also aim to improve the technical aspects of student abstracts, manuscripts, and posters.

Member Benefit
MentorNet
Takes Mentoring to a Higher Level!

The American Physiological Society (APS) and the Women in Physiology Committee are pleased to announce their partnership with MentorNet, an award-winning one-on-one mentoring program.

MentorNet's Academic Career E-Mentoring Program matches graduate students, postdocs and untenured faculty members in physiology with experienced scientists for an 8-month mentoring relationship conducted via e-mail.

MentorNet also offers a Résumé Database for students seeking jobs or internships.

Any APS Member or nonmember (of any status) can be a mentor in this program. However, to receive the benefit of coaching and guidance from a mentor, you have to be an APS Member with the status of “trainee or early career”.

Questions? Contact Melinda Lowy (mlowy@the-aps.org; 301-634-7787)

Want to use MentorNet right away? Become an APS member today. Apply online at: www.the-aps.org/memapp2/ or email: members@the-aps.org

The Integrative Biology of Exercise - V
September 24 - 27, 2008, Hilton Head, South Carolina

Preliminary Program
- Regulation of Peripheral Vascular Resistance
- Control of Ribosomal Biogenesis in Muscle Hypertrophy
- Muscle as an Endocrine Organ: Inter tissue Influences
- Stem Cells and Nuclear Domains in Skeletal and Cardiac Muscle
- Somatic and Sympathetic Neural Control During Exercise
- Comparative Exercise Physiology: Linking Animal Locomotion To Human Performance
- Reactive Oxygen Species: Consequences On Cellular Metabolism
- Remodeling of the Extracellular Matrix of Tendon and Skeletal Muscle in Response To Exercise
- Signaling Mechanisms Regulating Metabolic and Transcription Processes In Skeletal Muscle
- Roles of Biomechanical Signaling In Cardiac and Skeletal Muscle
- Role of Inflammation in Healthy, Diseased and Aged Muscle
- Sarcolemmal, T-Tubule and Intracellular Determinants of Contractile Function In Skeletal Muscle

2008 APS Intersociety Meeting
SPONSORED BY:
- The American Physiological Society
- American College of Sports Medicine
- Canadian Society for Exercise Physiology

DEADLINES:
Abstract Deadline: June 2, 2008
Advance Registration Deadline: August 25, 2008
