**Authors:**

**Publish your name in your native language**

Authors who publish in APS journals may now present their names in non-Latin characters
(in their native writing system) alongside the standard English transliteration of their name in
the main author line of the published article; for example, "Ta-Ming Wang (王大明)."

We will accept any non-Latin languages that have standard Unicode characters designated
for the native characters. For authors that choose this option, please only provide the
native expression for the original written form of the transliterated name; that is, do not
include any associated degree, rank, or title information in the native format. This feature
is meant for the person’s name only, not for ancillary information regarding academic
achievement or institutional affiliation.

**To take advantage of this new feature, please insert the native expression of your name**
**alongside the English transliteration in the main title page of your manuscript submission.**
