The Columbus Instruments Oxymax - CLAMS (Comprehensive Lab Animal Monitoring System) is a versatile device for monitoring metabolic performance of mice and rats. Customers choose from a selection of sub-systems that allow for the measurement of these possible parameters:

- VO2/VCO2 & RER
- Food Intake
- Drinking Volume
- Urine Production
- Body Mass
- Breaths / Minute

- Animal Activity
- Yoked and/or Paired Feeding
- Core Temp. & Heart Rate
- Running Wheel Activity
- Optional Environmental Enclosure

For more information: www.colinst.com

Animal Activity Monitor

The Columbus Instruments Auto-Track Activity Meter presents the ultimate flexibility for measuring in home or special cages. Measures these parameters:

- Distance Traveled
- Path of Movement
- Ambulatory Movement
- Stereotypic Movement
- Rearing (Vertical)
- Rotations
- Open Field
- Hole Poke
- Light / Dark
- Time-In-Square

Animal Treadmill

The Exer 3/6 Treadmill provides 6 mouse lanes or 3 rat lanes for general purpose exercise. Speed is adjustable from 2-102 m/min and acceleration is programmable in 0.1 m/min steps per second. Available with or without electric stimulus or optional stimulus detection system.

Rota-Rod: Rotamex-5

The Rotamex-5 measures coordination in up to four mice or rats by recording the latency to fall from a spinning rod. Key features include:

- Reports latency time to fall for each subject
- Reports rod speed in RPMin. or in cm/sec.
- Adjustable speed from 0-99.9 RPMin.
- Fully adjustable acceleration 0.1-20 RPMin/sec.
- Fall detection by photocells above the rod
- Detection of passive rotation (looping) in mice

Non-Invasive Blood Pressure: Columbus NIBP

The Columbus Instruments NIBP system measures blood pressure in mice and rats by way of specially designed tail cuffs. The system can support measurements in up to 8 animals, key features include:

- Systolic, Diastolic, and Mean Blood Pressure
- Warming Compartment heats the tail only for stronger Heart Rate signal with lower stress
- Thermostatic and adjustable Warming control
- Supports Manual and Automatic measurements
- Each measurement takes only 16 seconds
- Measurement quality is graded and reported
To take advantage of this new feature, please insert the native expression of your name alongside the English transliteration in the main title page of your manuscript submission.
FASEB Summer Research Conferences (SRC) are a continuing series of intimate inter-disciplinary conferences that explore new approaches in research areas undergoing rapid scientific changes. **Who should attend?** Those heavily engaged in research or are in ancillary fields where an accurate understanding of allied scientific advances is important. **Join over 3,700 fellow attendees!**

**2011 Conference Venues**
- Saxtons River, Vermont
- Carefree, Arizona
- Steamboat Springs, Colorado
- Snowmass Village, Colorado
- Barga (Lucca), Italy
- Crete, Greece

**2011 Conference Topics**
- Hematopoietic Malignancies
- Ion Channel Regulation
- NAD Metabolism & Signaling
- Translational Neuroimmunology
- Mobile DNA in Mammalian Genomes
- And over 30 more cutting-edge topics!

(SRCs run June 5 - Sept. 16, 2011. Visit [www.FASEB.org/SRC](http://www.FASEB.org/SRC) for a detailed schedule. CME credits available.)

Ready to attend? Submit a proposal? Sponsor an SRC? Contact us at SRC@FASEB.org or 301.634.7093.

**FASEB AdNet—The Advertising Network for the Life Sciences**

Need to promote open positions, fellowship opportunities, programs, or conferences in physiology?

Advertise in the publications of The American Physiological Society (APS). The APS publications are a perfect way to advertise to research investigators, clinicians, educators, and information specialists in all disciplines of physiology. Two of the APS publications, *Physiology* and *The Physiologist* are distributed to over 11,500 APS members. Most APS publications offer email advertising options and the APS eNews Update accepts advertising. Online ad design is available. Recruitment and product advertising are accepted.

**CONTACT FASEB AdNet at 301-634-7103 or email adnet@faseb.org for an ad estimate.**

View APS rate card and full media kit at [www.faseb.org/adnet](http://www.faseb.org/adnet).
Announcement!

Physiological Genomics

Going Online-Only in January 2011!

We are pleased to announce that Physiological Genomics will migrate to an online-only format beginning January 2011.

Your online subscription brings you all of these features!

- Weekly early view publication
- Monthly final publication
- Supplementary data
- PDFs
- Editor’s Picks
- eTOCs
- RSS Feeds
- Enhanced full text search features and an intuitive browsing experience
- Searchable through Google
- Links to Medline and GenBank
- Free access to the extensive collection of back issues available online 12 months after publication
- CiteTrack: Receive email alerts when new content matches criteria based on the topics, authors, and articles you want to track
- LOCKSS and CLOCKSS: Perpetual/Electronic Archiving of the LOCKSS and CLOCKSS systems preserves the electronic content of all APS journals
- CrossRef participant
