Oil Red O Micrographs following incubation of Control and C2C12 myoblasts under different lipid treatment conditions. Densitometry of these micrographs is shown in Figure 2.
Supplemental Figure 2

Oil Red O Micrographs following incubation of Control and C2C12 myoblasts following TG+ and THL treatment conditions. Densitometry of these micrographs is shown in Figure 4.
Retention of medium glucose label in cell glycogen. Values are expressed as mean ± SEM. For all conditions, n=4.
